

Kombi Van EV Conversion Overview

Kombi Van EV Conversion

Concept and Design

Designed and implemented an electric conversion on a 1955 Split-Screen Kombi-van.

This involved developing the car's concept, Electric System integration & design and an installation of these systems into the vehicle.

Wiring and Fabrication

Designed the wiring diagrams and was responsible for the wiring harness construction

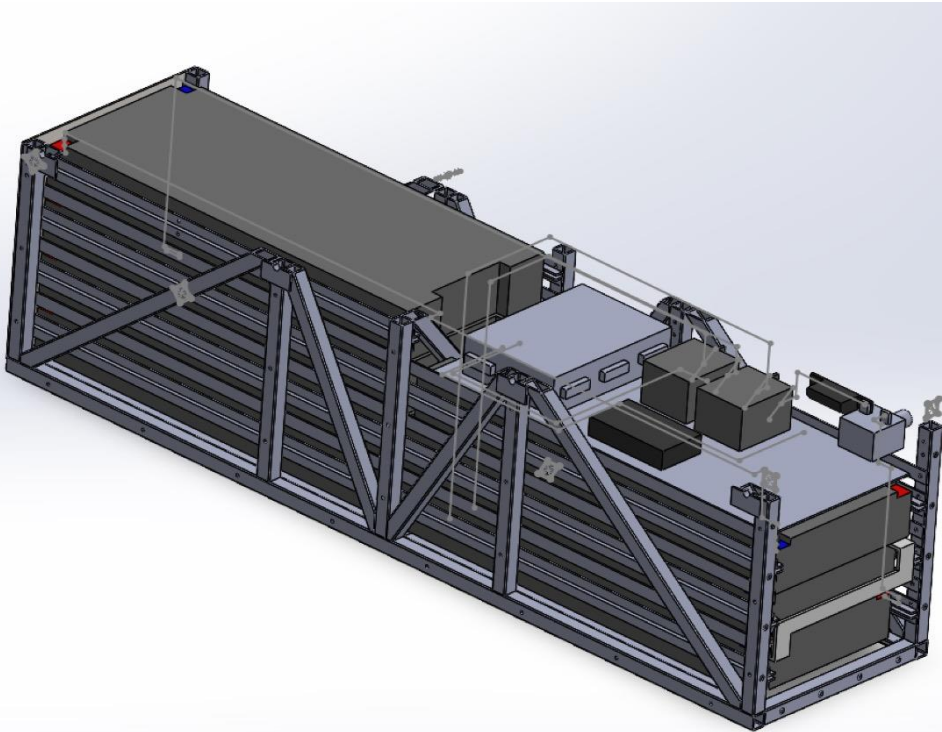

Rewired Entire 12V System

Fabricated and installed components to go into the vehicle

Testing and Troubleshooting

Troubleshooted and remedied problems in vehicle shakedown and testing

Concept and Design

Battery Pack Design

Designed battery pack system and got ADR certification on the design.
